

EXCEL INDUSTRY CO. LLC 2.5 CBM GALVANIZED TROLLEY BIN

FEATURES

Suitable for waste containment and emptying into mobile compactor trucks through the rear end, automatic lifting mechanism of the truck.

Manufactured as per the DIN-30738 Standard.

The container is constructed with high quality MS Sheets and finished with a hot dipped galvanizing process executed at the Excel Industry plant.

The container has a curved shape lid (cover) manufactured with high quality molded metal plates with two springs for easy use.

The cover slips automatically during discharge of the garbage.

The cover is supplied with a rubber strap for fly proofing and to protect the hands of the users.

The arms have two torsion springs for smooth movement when opening and closing the lid.

Wheels: Each container has four heavy-duty caster wheels of 200mm diameter (2 caster swivel type with brake + 2 caster swivel type without brake).

Drainage hole: Provision of drainage hole at the bottom of the container for liquid draining and cleaning.

Warning reflector: Provision of aluminium warning reflector strips on the four edges of the containers.

All container parts are assembled through welding MIG system Co2, including the lifting handles and lever arms, to provide the container with sufficient strength and resistance.

TECHNICAL SPECIFICATION

Capacity	2.5 m ³
Width	1350 mm
Length	2040 mm
Height	1640 mm
Material	MS Sheets
Finish	Hot-Dipped Galv.
Approx. Wt	280 Kgs

ACCESSORIES

Front Caster Wheels 8" Dia.
(Swivel with Brake)

Rear Caster Wheels 8" Dia.
(Swivel without Brake)
